Working Student Project – Visualization Applet for Battery Electrode and Cell Design Parameters

Are you interested in Batteries?

Do you enjoy sidequests?

Are you looking to apply your design and ICT skills?

Do you have experience in creating simple UIs?

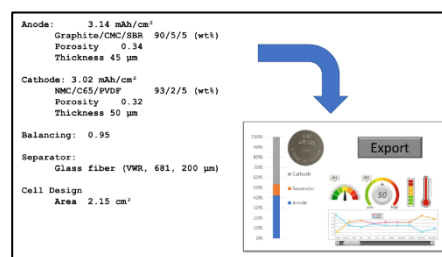

Figure 1. Sketch of Workflow

Join the Battery-Coast team at UiA in a working student project either individually or in a small team. Plan your working hours flexibly and benefit from applied learning experiences in an applied research environment as well as financial support.

The challenge: (I) Familiarize yourself with battery and electrode designs, (II) design user-friendly UI to add battery characteristics, (III) create graphical export of experimental checklist, (IV) document the project.
